

American Event Services

## 10 Ton Air Conditioning Units

American Event Services designs, builds and *Rentalizes* custom temperature control equipment for temporary or permanent applications. Whether cooling a tent or a building, our R & D department can design a system that meets the most demanding expectations in unique environments.

### About Our 10 Ton AC Units:

- Powder coated – stackable frames with dedicated strapping points for shipment
- Feed through cam style electric connections for quick and clean power connections
- Electric resistive heat strips
- Volt meters
- Phase / Voltage monitors with lock out protection
- Digital thermostat mounted internally or remotely with 20' of quick connect cord
- Optional 20 amp GFCI outlet
- Custom paint and graphics
- Ultra-quick system for 20" spiral duct connections
- Internally mounted thermal breaker

### What is *Rentalizing*?

American Event Services transforms standard equipment to meet the unique needs of the rental industry.

Industry-leading AES Rentalized equipment is:

- Easy to Use
- Designed and built to withstand robust use in the rental industry

American Event Services

## American Event Services also offers Rentalized:

- 5 Ton to 50 Ton AC Units
- 10 Ton to 440 Ton Chillers
- Cooling Towers and Pumps
- Power Distribution
- Chiller Test Stations
- Air Handlers
- And more

### Upgrade options to “Super Units” include:

- Internal transformers and power distribution package (up to 12 – 20 amp circuits)
- Condensate pump with externally mounted 3/8” barb fitting
- Hinged plenum doors for easy equipment access and storage during transport
- Twist lock power taps for low voltage power distribution
- Externally mounted pressure gauges

### Upgrade options to DH units include dual mode operation or standard operation.

- Dual cool / heat mode operation to get 100% unit DH capacity with re-heat
- HGBV installed to prevent freezing in cold temperature operation
- Heat stage 1 / 1&2 switch to prevent overdraw of power
- Switch for standard / DH mode
- High / Low pressure fault LED indicator lights
- Standard thermostat and internally mounted DH mode JCI System 450 controller
